

# Eccleston Lane Ends Primary School

*Working with each other  
and for each other.*

## ELE's vision and Principles for Science

At ELE, our vision is to give every child a broad and balanced Science curriculum that enables them to confidently explore and discover what is around them, so that they have a deeper understanding of the world that surrounds us.

We want every child to secure and extend their scientific knowledge and vocabulary.

We conduct lots of experiments and investigations.

We have learnt about diversity and how different scientists have impacted the way we learn.

We want to include exciting practical hands-on experiences that encourage curiosity and questioning.

We want our children to cherish memories and embrace the scientific opportunities they are presented with.

We discover new scientific words when we learn about new topics.
